

Explore some of the most common intellectual property issues faced by engineers, managers and other individuals working in the high technology industry in this 2-Day Course.

**WORKSHOPS • CASE STUDIES
INTERACTIVE GROUP PROJECTS**

► **Topics of Interest:**

- Overview of Intellectual Property Law
- Identifying Intellectual Property
- Preparing a Patent Application
- Patent Prosecution
- Reviewing Your Competitor Patents
- Understanding Intellectual Property Contracts

Intellectual Property Law for the High Technology Industry

Electrical Engineering & Computer Science X429.5 (1.50)

Explore some of the most common intellectual property (IP) issues faced by engineers, managers and other professionals working in the high technology industry. Gain the knowledge of IP law that will help you plan and organize an effective IP portfolio. Learn about topics that include recognizing different types of IP, identifying protectable intellectual property, minimizing the risk of infringing a competitor's patent, and maximizing patent value through licensing or enforcement. Case studies and guest speakers augment the course lectures.

This seminar benefits those who are exposed to intellectual property issues at work or simply interested knowing more about intellectual property law. These topics are applicable to all industries, including biotechnology, medical device, semiconductor, chemical, electrical, and mechanical engineering.

Instructor: Sabling H. Lee, J.D., is a partner at Knobbe, Martens, Olsen & Bear LLP. He specializes in patent protection and other forms of intellectual property protection. Other attorneys in the firm join Mr. Lee as guest speakers.

When: Friday and Saturday, April 13 & 14
8:30am-5:00pm; 2 meetings

Where: Room 208, UCI Learning Center
200 S. Manchester Ave., Orange

Fee: \$335; includes materials
